EDUCATION

University of Florida

GPA: 3.87/4.00

B.S. in Computer Science, B.S. in Math (Honors)

Spring 2027

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Systems, Software Engineering, Computer Organization, Natural Language Processing, Competitive Programming, Discrete Mathematics, Linear Algebra, Abstract Algebra

SKILLS

Languages: C++, Python, TypeScript, JavaScript, Java, Rust, C#, SQL, HTML, CSS, Bash, ARMv8

Frameworks / Libraries: React, Next.js, React Native, Tailwind, Express, FastAPI, DrizzleORM, Vitest, Zod, TensorFlow, SKlearn

Tools / Platforms: GCP, AWS, Kubernetes, Docker, Git, Linux, GitHub Actions, Firebase, SQLite, PostgreSQL, MongoDB, Redis, Jira, Figma, Unity, DevTools, Nginx, REST APIs, WebSockets, OAuth2.0

INVOLVEMENT

Technical Lead

Gainesville, FL

Google Developer Group

Fall 2025 – Present

- Designed and delivered **5 workshops** reaching **60+ attendees** on system design and Google developer projects including Google Cloud Platform (Run, Engine, Storage, ADK, BigQuery), Tensorflow, Gemini API, and Chrome extensions.
- Mentored a team of **20 students** participating in weekly scrums to deliver a campus-driven app over a semester.

Undergraduate Researcher

Gainesville, FL

Just&Green Transportation Lab

Fall 2025 – Present

- Designed an NLP pipeline processing 15 years of unstructured crash narratives to identify e-mobility involvement, using Spacy, PyMuPDF, and OpenAI SDK validated against a 3,000-report ground truth dataset.
- Built an LLM-as-a-Judge validation pipeline to analyze model discrepancies reducing manual review by 80%.

Fullstack Developer

Gainesville, FL

Society of Asian Scientists and Engineers (SASE)

Spring 2025 – Present

- Collaborated on an iterative team to develop frontpage, blogsite, and member management platform for **1,000+ users**.
- Spearheaded unit and integration tests on legacy code, increasing coverage by 300% and fixing numerous production bugs.
- Implemented REST APIs using Hono, Bun, Drizzle for user auth, OAuth2.0 integration, and user / event management.

PROJECTS

KoalaKite | *Fastify, React, MongoDB, Chrome MV3, Gemini API*

Spring 2026

- Created a parental awareness platform with Chrome extension, React dashboard, and Fastify backend, integrating GitHub Actions CI/CD for automated testing, linting, and deployment (**SwampHacks – Best Use of GitHub**).
- Implemented client-side perceptual hashing and local caching to filter screenshots before transmission, reducing Gemini Vision API classification costs by **85%**.
- Built REST APIs with Fastify and MongoDB for user registration, device setup, and alerts, integrating AWS S3 for screenshot persistence and Nodemailer SMTP for automated parent notifications.

Fitted | *Express, React, Tailwind, PostgreSQL, Drizzle, Gemini API*

Fall 2025

- Developed a fashion discovery platform with OAuth 2.0 authentication via Better Auth and digital closet for outfit creation, scraping **40,000+ products** from StockX GraphQL endpoints using header spoofing and TLS fingerprinting.
- Implemented search using pgvector embeddings on product metadata, using cosine similarity queries for context-aware recommendations and Gemini Vision API for virtual try-on generation.

Self-Hosted Cloud | *Kubernetes, Docker, C++, Next.js, PostgreSQL, Nginx*

Fall 2025 – Present

- Engineered a bare-metal K3s cluster on Debian AMD64 machines orchestrating 7+ containerized applications with StatefulSets for PostgreSQL & Redis databases and Deployments for stateless services.
- Automated SSL certificate management using cert-manager with GoDaddy DNS-01 webhook integration, routing multi-domain traffic through Nginx Ingress using MetalLB load balancing.

NOTABLE AWARDS

Awards: MOS World Championship 1st Place PowerPoint, MOS World Championship 2nd Place Excel, Samsung SFT Finalist

Certifications: NVIDIA Fundamentals of Deep Learning, NVIDIA Building Transformer-Based NLP Applications, IT Specialist: Python, IT Specialist: JavaScript, IT Specialist: Java, MS Excel Expert, MS Word Expert, Autodesk Inventor
